

Electrical Technician - Glasgow

Clydebank (G81), Clydebank

From £24,000 to £27,000 per annum

Saur Services (Glasgow) Ltd

Permanent

Saur Services Glasgow offers a range of family friendly, inclusive employment policies and is committed to promoting a diverse and inclusive environment where we can all be ourselves and succeed on merit.

About the Role

The primary duties of the position include skilled execution of planned & corrective electrical maintenance activities, ensuring reliable condition and robust performance of numerous and varied items of plant and equipment across the SAUR Services West of Glasgow site.

Fault finding and root cause failure identification, a proactive approach to defect correction and reporting with a sound ability for swift breakdown resolution in emergency process situations. Co-ordination with existing maintenance, operations and process departments as well as adopting safe working techniques and good overall engineering practice.

Key Duties / Requirements

- Implementation of scheduled planned maintenance by realising work orders generated by the computerised maintenance management system (CMMS).
- Reacting to failure/breakdown of equipment and carrying out corrective/remedial measures as necessary or directed.
- Possess & demonstrate a comprehensive knowledge of industrial electrical equipment, especially PLC, Electrical panels and components, MCCs, Scada, General electrical duties etc.
- Perform strip down, repair, overhaul & test of various electrical plant.
- Install & repair various types of industrial equipment and component.
- Be able to solve problems by properly investigating symptoms and tracing back to identify root cause.
- Suggestion of solutions for continuous improvement of plant safety, reliability and overall efficiency.
- Identification & reporting of abnormal equipment behaviour or critical process situations.

Knowledge and Skills Required

- Certification of IET Wiring Regulations BS7671 to 17th/18th edition standard is necessary.
- Electrical engineering apprenticeship at trade level essential.
- Working experience in a similar role or position.
- Working knowledge of automated/PLC controlled equipment, MCC and Scada.
- Ability to read & understand electrical, mechanical and process schematics / specifications – including P&ID
- Good understanding of mechanical systems and constraint beneficial
- Experience & knowledge of heavy Industry is preferred.
- Current CSCS card or similar preferred

- Current PASMA and MEWP licence beneficial.
- Current forklift license beneficial.
- Current certificate for competency in confined spaces & escape BA beneficial.
- Strong understanding and appreciation of the need for safe systems of work, including risk assessment & method statements, isolation procedures and permit to work systems.
- Ability to use hand held computerised equipment.
- Strong oral and written communications skills.
- Committed and self-motivated, with very good human relation skills.
- Demonstrated ability for independent decision-making when required.
- Must be flexible and responsive to the needs of the business.
- Current drivers licence.

The core working week is 37hrs Monday to Saturday. However, the successful applicant shall be available to work additional hours as and when required due to plant operational needs, and to participate within a Standby Call-Out rota.

Responses should be submitted by attaching your CV in reply to this advert.

Working with Saur

Saur is a leading water industry specialist, supplying safe drinking water and the latest in waste water and waste management to domestic and commercial customers around the world.

With operations throughout Europe, UK, the Middle East and Africa, and a headquarters in France, Saur employs over 13,000 people and has an excellent reputation for quality and service.

Here in Scotland, we operate the Wastewater Treatment Works in Dalmuir on behalf of Scottish Water. This facility serves more than 600,000 people over an area of around 200,000 square miles. It is a sophisticated treatment facility that ensures that residents and businesses receive a reliable clean water supply and that waste water is treated safely in accordance with regulations and legislation.

Why work for Saur?

We work in one of the most vital industries in the world, so no matter what your role here, your job matters. We're looking for enthusiastic people who want to work in a company that takes its responsibilities seriously. We are friendly and accommodating and we work closely with our local communities so that they are confident in our ability to manage their water supplies.

We're a fair and equal employer with a positive culture and a focus on opportunity and progression wherever possible. Our salaries and benefits are industry-standard and we are proud of our reputation for dedication and progressive thinking.
